

CDC: Proposed Consolidation Of Infant Vaccine Information Statements.

On October 4, 2007 the Centers for Disease Control and Prevention put forth a proposal to consolidate the required vaccine-information statements for six vaccines commonly given to infants between birth and age six months into one consolidated vaccine-information statement.

The CDC will likely have this available sometime in late December, 2007. Use of the six separate vaccine-information statements will still be valid and acceptable after the new consolidated statement comes into use. The new consolidated statement will not change any of the CDC's current recommendations for infant vaccinations.

All of the CDC's current vaccine-information statements and recommendations for pediatric and adult vaccinations are available from the CDC at <http://www.cdc.gov/vaccines/pubs/vis>.
